

Stall No : 14

BENEFITS AND SERVICES

FRICTION WELDING

Once Friction Welding is done, 20 feet rod will stay as 20 feet rod throughout its lifetime.

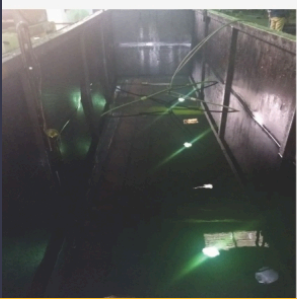

STRESS RELIEVING

It removes stress on the welding joints that are created during Friction and ensures safety of rods without any cracks in friction welding.

INDUCTION HARDENING

In Induction hardening, the hardness (HRC) of the whole rod (0-20ft) is increased, with which wear and tear of your rods will come down drastically and there will be a 50% increase in the lifetime of your rods.

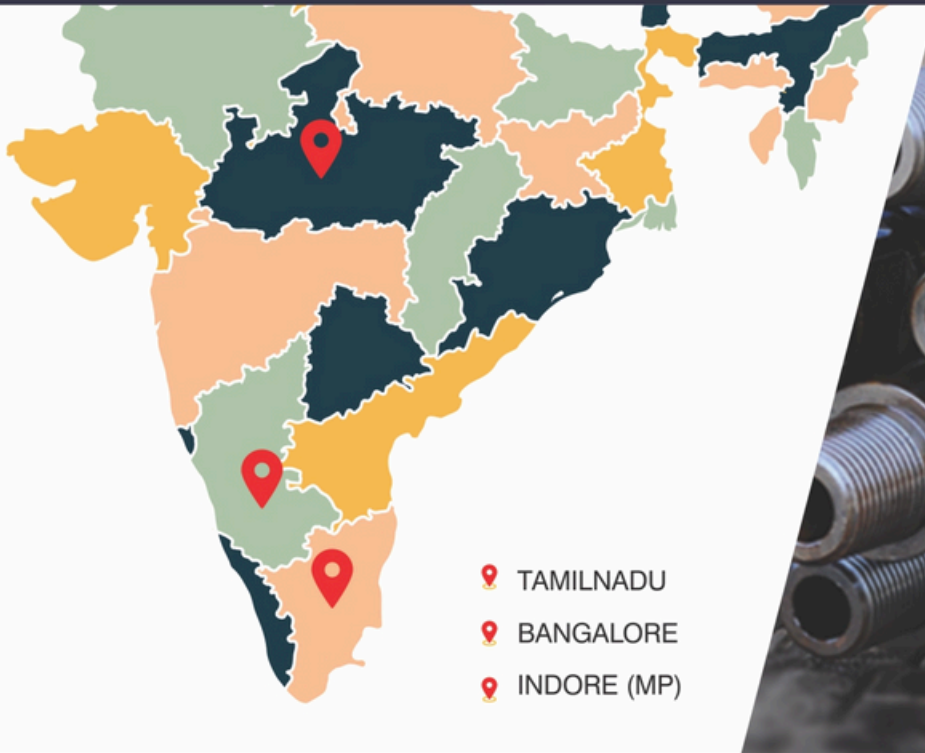

OIL TEMPERING

By Quenching the Rods in Oil the Hardness of Rods will be even and will increase the lifetime of the Rods.

INNOVATIVE PLANS TO BE MET IN FUTURE

- Rig mounting.
- Expanding our branches to other parts of the country.
